MESSAGE IN NTS FORMAT FOLLOWS

NR 185 R K9LGU 13 FORT ATKINSON WI APR 14  
WISCONSIN ARES/RACES OPERATORS  
INFORMATION FROM THE ICS217A FORM  
HELPS IN PREPARING THE ICS205  
INCIDENT COMMUNICATIONS PLAN

K9LGU/STM

Once operators(or the COML) know the information, i.e. the communications channels, frequencies, narrow or wide band, modes, any CTCSS tones or sub-audible tones, we can make a functional ICS205 communications plan for an incident or event. An event is usually a non-emergency activity while an incident is something that requires a response to protect life or property The Planning Section Chief will include a copy of the ICS205 in the Incident Action Plan for everyone involved. Luckily, we can plan ahead. Our local unit's Emergency Operations Plan should include a typical ICS205 that can then be updated for an incident or event. K9LGU/STM
